EXPERIMENT STATION RECORD

EDITOR: HOWARD LAWTON KNIGHT

EDITORIAL DEPARTMENTS

Agricultural and Biological Chemistry, Soils, and Fertilizers-H. C. WATERMAN, SYBIL L. SMITH, MABEL DICKSON DILL.

Agricultural Meteorology-W. H. BEAL, F. V. RAND.

Agricultural Botany, Diseases of Plants-H. P. BARSS, F. V. RAND.

Genetics-H. M. STEECE, J. W. WELLINGTON, G. HAINES.

Field Crops—H. M. STEECE.

Horticulture and Forestry-J. W. WELLINGTON.

Economic Zoology and Entomology, Veterinary Medicine-W. A. HOOKER.

Amimal Husbandry, Dairying, and Dairy Farming—H. W. MARSTON, E. C. ELTING. Agricultural Engineering—R. W. TRULLINGER.

Agricultural Economics-F. G. HARDEN, B. YOUNGBLOOD.

Rural Sociology-B. YOUNGBLOOD, F. G. HARDEN.

Agricultural and Home Economics Education—F. G. HARDEN.

Foods and Human Nutrition, Home Management, and Equipment—SybiL L. SMITII. MARIANA T. NELSON, MABEL DICKSON DILL.

Textiles and Clothing-H. M. STEECE, SYBIL L. SMITH, MABEL DICKSON DILL. Indexes-Martha C. Gundlach.

Bibliographies-Cora L. FELDKAMP.

Cooperation with Biological Abstracts-F. V. RAND.

SUBJECT INDEX

NOTE.—The numbers inclosed in parentheses refer to volume numbers, the others to pages. The station publications are indicated by an abbreviation of the station immediately before the page number, except where all the references are from the same station, in which case the abbreviation precedes the volume number. "U.S.D.A." refers similarly to publications from this Department.

Apparatus-Continued.
                                                  Apparatus-Continued.
 for-continued.
   soil washing, (75) U.S.D.A. 77.
   spraying apples in laboratory, (75) U.S.D.A.
   starch determination, (75) 808.
   studying effect of gases or vapors on micro-
       organisms, (74) 766.
   studying effect of increased atmospheric pres-
       sure on developing eggs, (72) 679.
   studying effect of low concentrations of gases.
        (79) 609.
   studying water relations in potted plants.
       (79) 609.
   sugar titrations, (76) 749.
   taking soil temperature, (74) 451.
   testing contact insecticides. (78) 207, 341.
   testing dairy glassware, (75) N.Y State 101.
   treating insects with contact dusts, (75)
       U.S.D.A. 76.
   treating plants with heat, (77) 31.
   uniform release of volatile chemicals, (75)
       U.S.D.A. 76.
   vitamin purification, (72) 584.
  freezing, with change of temperature auto-
       matically controlled, (79) N.H. 455.
  germinator for root work, description, (74) 765.
  glass head for laboratory water still, (79) 5.
  handy borer for soil surveyors, (78) 159.
 home-made laboratory sprayer, (78) 811.
 improved-
   for inseminating queen bees, (78) 374.
   for study of upper-air microbiology, (80) 154.
  pelmeter, viscosity pipette, (74) 567.
  Kjeldahl distillation, special head, (79) 6.
 laboratory, for determining relative toxicity of
       contact dusts, (80) 223.
  manometer, constant-volume differential de-
       scription, (71) 742.
 manometric manostat, description, (75) 152.
 melting point, electrically heated, (76) 746.
 microburette, description, (72) 446.
 milk irradiation, development, (74) Wis. 586.
 multiple-unit distilling for determination of
       fluorine, (76) 149.
   distillation trap, (74) 296.
   for carbonic-acid estimations in soils, (76)
       151.
   photometer adapted to botanical purposes,
        (72) 598.
    shear, for determining shearing resistance
       of fill materials, (77) 404.
 oil gage, precision, description, (75) 585.
  percolator, automatic continuous, (80) 295.
  photo-electric cell, for determining minute
       quantities of precipitates, (71) 9.
  pipetting machine, multiple, description and
       plans, (79) 104.
  presentator for pressing fluid from cooked
       mest, (72) 182.
  proofing cabinet, modified, (72) 867.
  resistance porometer, application to study of
       stematal movement, (72) 454.
  respiration for small animals, (74) 722.
 ring shearing, for determination of shearing
       resistance and plastic flow, (76) 401.
 rest-innomiation chamber, portable, despription
        (78) 228.

   thermal relations, (77) 761.
                                                       conservation, (76) U.S.D.A. 400.
   tissue cultures, defined, (78) 169.
                                                       erosion, control, (73) U.S.D.A. 548; (74)
   tissues, meristematic, culture, (80) 171,
                                                           112: (80) U.S.D.A. 310.
   vascular, (76) 764.
                                                       erosion-control practices, early, (77) U.S.D.A.
 plowing problems, research, (71) 260.
 poisonous foods and plants, (71) 528.
                                                       science, fertilizers, and agronomy, (74) 597.
 pollination research, (77) 457.
                                                     sore mouth of sheep and goats, (71) 846.
 Polynesian botany, (78) 598.
                                                     spray deposits, (80) Calif. 799.
                                                     springtails of family Isotomidae, keys, (79) 362.
 Polyporus schweinitzii on white pine seedlings.
       (78) 655.
                                                     squirrels, ground, of North America, (79)
 potash deficiency symptoms, (78) 639.
                                                           U.S.D.A. 501.
 potassium, role in chlorophyll synthesis, (74)
                                                     stablefly control, (78) 225.
       618.
                                                     standardization of field experiments, (80) 758.
 potato(es), (76) 472.
                                                     staphylococci, immunity, (80) 102.
   diseases, virus, (74) 799.
                                                     starling, Chinese, in Pacific Northwest, (73)
   fertilization, (74) 190.
                                                           U.S.D.A. 639.
   leafhopper as bean pest, (80) U.S.D.A. 229.
                                                     State planning publications, (80) 120.
   rugose mosaic, (78) 799.
                                                     stomata, behavior, effect of various liquid fixa-
 poultry diseases, (76) 858.
                                                          tives, (77) 174.
 prairie, mixed, in Kansas, (79) 23.
                                                     stone flies, (73) 209.
 pregnancy-
                                                     stoves, electric, (71) U.S.D.A. 898.
   disease of sheep, (73) Ky. 242.
                                                     strawberry root weevils, (75) Oreg. 283.
   metabolism, (73) Okla. 715.
                                                     streptococci, hemolytic, (77) 896.
                                                       mode of action of sulfonamide and Prontosil,
 proteins of leaves, determination, (78) 151.
 protoplasm, structure, (72) 749.
                                                           (77) 397.
 protozoa parasitic in wild rats in Baltimore.
                                                     Strongyloides ransomi, (72) U.S.D.A. 695.
       (76) 212.
                                                     Strongyloides ratti, active acquired resistance in
                                                           rats, (77) 851.
 pullorum disease. (73) N.C. 691.
 pullorum disease, agglutination tests, (72) 260.
                                                     sugar beet virus diseases, (76) 205.
 purslane, natural enemies, (79) 651.
                                                     sugar beets, copper deficiency, (77) 59.
 pyrethrum insecticide, (72) 809.
                                                     sugarcane-
                                                       disease resistance, (80) U.S.D.A. 501.
   use in warehouses, (75) 660.
 Pythium genus, (76) 312.
                                                       froghopper, (80) 515.
                                                     sulfur bacteria, formation of sulfide, (77) 608.
 rats, breeding rates, (76) 211.
 red scale, California, in Palestine, (72) 660.
                                                     sulfur, insecticidal, particle size, (79) 654.
                                                     surra, (71) 702; (74) 260.
 refrigeration, (72) 400.
                                                     Syrphidae of Illinois, (80) 518.
 relapsing fever in Texas, (71) 530.
                                                     tapeworms in fowls of Kansas, (72) 258.
 respiration in plants, (75) 312.
                                                     tapeworms in sheep, (78) 543.
 respiration of barley leaves, (78) 606.
 Rhizobium app., cell inclusions and life cycle,
                                                     tariff, (72) 270.
       (80) 167,
                                                     taste and chemical constitution, (72) 870.
 Rhodophesas, (75) 320.
                                                     teeth decay, cause, (72) 783.
 Rhopalocera, described life histories, (80) 372.
                                                     Tennessee, human and physical resources, (78)
